

## Nasal cannulae

A range of products for all patient groups

Oxygen and Aerosol Therapy • Nasal Cannulae

## Nasal cannula

### Conventional nasal cannula

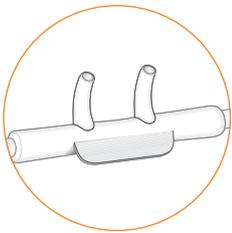

A range of products for adult, paediatric and neonates are available with a wide selection of prong shapes to suit all patient requirements. All oxygen tubing in the range is manufactured in a 'multi-channel' design, which permits oxygen flow even if the tubing is kinked.

### Also available in Satin

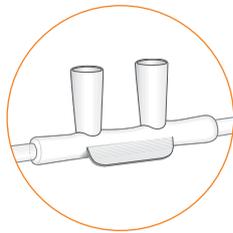

Cannula made from Intersurgical's soft satin material.

### Prong shape

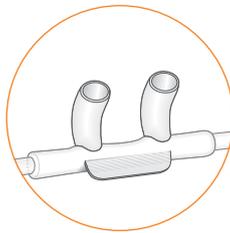

The following prong shapes are available:

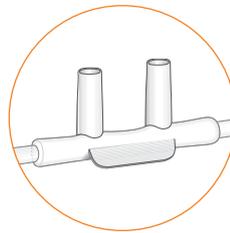

**Curved prongs:**  
Improved anatomical shape and fit

**Flared prongs:**  
Slow down the flow of oxygen

**Curved and Flared prongs:**  
Combines the benefits of both

**Straight Prongs**

**Curved prongs with Intersurgical EarGuards:**  
Improved anatomical fit and patient comfort

### Intersurgical EarGuard™

The Intersurgical EarGuard option includes soft silicone foam cushions, which are easily adjusted and securely fitted to prevent trauma to the patient's ears.

### Non-phthalate nasal cannula

All of the nasal cannula featured in this information sheet are now manufactured using non-phthalate materials to address DEHP exposure concerns.

### Multi-Channel oxygen tubing

Allows oxygen to continue to flow if the tubing becomes kinked

### Non-slip toggle

Enables user to adjust for best possible fit

### Non-phthalate

Addresses DEHP exposure concerns

### Clear material

Unobtrusive

### Over-ear design

Secure positioning

(Intersurgical EarGuard™ option available for added comfort)

### Soft prongs

Minimise irritation

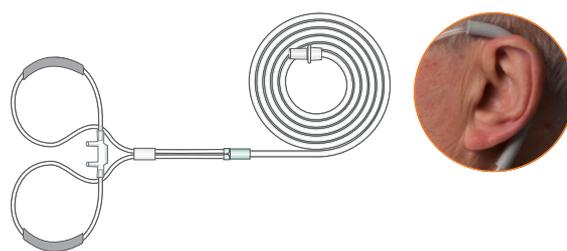

### Location saddle

Assists in the optimum positioning of the prongs
